01 / Management, Leadership & Soft Skills Training

8 PROGRAMS

People & Human Resources

Build stronger teams, HR practices and learning capability.

Advanced Human Resource Management

HR strategy, talent acquisition, succession planning and workforce analytics.

Conflict Management in the Workplace

Prevent and resolve conflict through communication, negotiation and practical intervention.

Certified Train the Trainer

Design engaging training using adult learning principles and confident facilitation.

Employee Relations: Roles & Responsibilities

Employee engagement, grievance handling, workplace communication and legal considerations.

How to Write Human Resources Policies and Procedures

Create clear HR policies, communicate procedures and maintain compliance.

Human Resources KPIs: Benchmarking HR Deliverables

Measure HR performance, benchmark outcomes and use workforce data for improvement.

Talent Management

Attract, onboard and retain talent through development and succession planning.

Performance Management from Goal Setting to Appraisals

Set measurable goals, provide constructive feedback and conduct effective appraisals.

01 / Management, Leadership & Soft Skills Training

8 PROGRAMS

Leadership & Project Delivery

Develop leaders who connect strategy with execution.

Leadership and Management Skills for Supervisors

Team coordination, delegation and communication aligned with organizational goals.

Innovative Leadership Competencies

Encourage creativity, guide change and lead in complex environments.

Develop Emotionally Intelligent Leadership Skills

Build self-awareness, manage workplace emotions and strengthen leadership decisions.

Strategic Leadership

Create a long-term vision and align leadership decisions with organizational priorities.

Risk Management

Identify organizational risks, strengthen governance and select appropriate risk responses.

Advanced Management Motivation, Strategic Planning

Align team motivation with strategic priorities and implement effective plans.

Creative & Innovative Management for Supervisors

Encourage creative contributions and build a culture of innovation within teams.

Project Management Professional (PMP) Certification

Plan scope, resources, schedules and costs; strengthen team leadership and delivery discipline.

01 / Management, Leadership & Soft Skills Training

4 PROGRAMS

Customer Experience & Sales

Strengthen customer relationships and commercial conversations.

Excellence in Customer Service

Handle inquiries, complaints and feedback to create positive customer experiences.

Certified Customer Service Professional

Customer relationships, service problem-solving, conflict resolution and professional ethics.

How to Deal with Angry Customers

De-escalate difficult interactions through empathy, listening and practical resolutions.

Effective Selling Techniques

Move from prospecting to closing while addressing customer needs and building lasting relationships.

01 / Management, Leadership & Soft Skills Training

13 PROGRAMS

Communication & Professional Skills

Communicate clearly, negotiate effectively and work with confidence.

Effective Communication and Inspirational Presentations

Strengthen public speaking, presentation delivery and non-verbal communication.

Presentation Skills

Design engaging presentations, use storytelling and handle questions with confidence.

Technical Report Writing

Organize technical information into clear, precise and concise reports.

Advanced Business Writing

Write professional proposals and business documents with clear tone and audience awareness.

Negotiation Techniques

Prepare negotiations, build trust, handle conflict and reach mutually beneficial agreements.

Teamwork Performance Improvement

Align team activity with organizational goals and strengthen leadership in changing environments.

Presentation Design & Delivery

Create compelling slides and tailor presentation delivery to different audiences.

Creative Thinking & Problem Solving

Generate ideas, tackle complex challenges and learn through experimentation.

Effectiveness of Communication Techniques

Adapt verbal and non-verbal communication and overcome communication barriers.

Developing Your Creative Potential

Overcome creative blocks and build a personal plan for creative development.

Handling Pressure, Prioritizing, and Emotion at Work

Manage stress, prioritize responsibilities and build emotional resilience.

Negotiation Skills: Achieving Successful Outcomes

Prepare thoroughly, communicate persuasively and maintain positive negotiating relationships.

Creative Thinking & Innovation Techniques

Move from ideation to implementation and turn creative ideas into practical solutions.

01 / Management, Leadership & Soft Skills Training

11 PROGRAMS

Accounting & Finance

Build financial confidence, control and informed decision-making.

Accounts Receivable: Planning, Organization & Best Practices

Organize receivables, improve collections and strengthen cash flow.

Managing the Cash Cycle

Manage receivables, payables and working capital to balance liquidity.

Accounts Payable

Streamline payment cycles and strengthen vendor relationships.

Mastering Finance and Accounting

Interpret financial statements and apply financial data to business decisions.

Budgeting, Planning & Management Reporting

Create budgets and use management reports to support informed decisions.

Financial Management for Projects & Contracts

Apply project budgeting and cost control; assess financial implications of contracts.

Finance for Non-Finance Professionals

Understand financial statements, key metrics and the impact of business decisions.

The Effective Accountant

Improve accounting accuracy, professional ethics, organization and time management.

Budgeting & Cost Control

Manage budgets, monitor costs and apply variance analysis.

Treasury and Cash Management

Optimize liquidity and cash flow while managing financial risk.

Advanced Budgeting & Forecasting

Develop financial models and integrate advanced forecasts into strategic planning.

02 / Technical Training

14 PROGRAMS

Cybersecurity & Network Defense

Develop technical security skills from foundations to leadership.

CompTIA Security+
Security fundamentals, risk, secure architecture, identity, cryptography and incident response.

CompTIA PenTest+
Scope testing, assess vulnerabilities, use testing tools and report remediation recommendations.

CompTIA Network+
Networking models, addressing, routing, wireless networks and connectivity troubleshooting.

CompTIA Cybersecurity Analyst (CySA+)
Analyze threats and vulnerabilities, monitor incidents and implement security solutions.

CompTIA CASP+ Advanced Security Practitioner
Enterprise security controls, authentication, cryptography and secure cloud infrastructure.

CertNexus CyberSec First Responder (CFR)
Identify, analyze and respond to cybersecurity incidents.

Certified Information Systems Security Professional (CISSP)
Information security domains and the design and implementation of security programs.

Certified Information Security Manager (CISM)
Develop and manage an organizational information security program.

Certified Ethical Hacker (CEH v13)
Ethical hacking methods, vulnerability assessment, penetration testing and security tools.

Certified Security Analyst (ECSA)
Advanced penetration testing, exploit validation and professional assessment reporting.

Certified Chief Information Security Officer (C|CISO)
Enterprise security strategy, governance, controls, budgets and vendor management.

Computer Hacking Forensic Investigator (CHFI)
Collect and preserve digital evidence; perform forensic analysis and prepare investigation reports.

EC-Council Certified Incident Handler (ECIH)
Classify incidents and manage containment, eradication, recovery and response communication.

EC-Council Certified Network Defender (CND)
Apply secure network design, defensive controls, monitoring and network security policies.

02 / Technical Training

6 PROGRAMS

Governance, Risk & Compliance

Strengthen assurance, resilience and responsible information management.

ISO 27001 Lead Auditor

Audit information security management systems and understand lead auditor responsibilities.

ISO 27001 Lead Implementer

Plan, implement and manage an information security management system.

ISO 22301 Lead Auditor (Business Continuity)

Plan BCMS audits, gather evidence, assess corrective actions and lead audit reporting.

ISO 27701 (Privacy Information Management System)

Privacy controls, processing risks, privacy impact assessments and breach response.

ISO 31000 Risk Management

Risk governance, assessment, treatment, registers and integration with strategic planning.

Certified Information Systems Auditor (CISA)

Audit information systems and evaluate IT governance, service management and access controls.

02 / Technical Training

10 PROGRAMS

Cloud & Connected Infrastructure

Connect cloud platforms, IoT and urban digital systems.

AWS Certified Solutions Architect
Design scalable, highly available AWS solutions using architecture best practices.

Cloud Computing
Understand cloud service and deployment models, security, governance and compliance.

Certified Cloud Security Professional (CCSP)
Secure cloud data, infrastructure and applications; manage access and security incidents.

IoT Fundamentals & Architecture
Design edge-to-cloud architectures using IoT protocols and cloud integration.

IoT Security & Risk Management
Assess device risks and apply authentication, encryption and secure provisioning.

Industrial IoT (IIoT) & Smart Infrastructure
Integrate OT and IT, apply predictive maintenance and secure industrial infrastructure.

Smart Cities Architecture & Strategy
Develop urban transformation roadmaps and integrate IoT, AI, governance and sustainability.

Smart Mobility & Intelligent Transportation Systems
Explore ITS architecture, V2X, traffic optimization and mobility analytics.

AI & Data Analytics for Smart Cities
Apply urban predictive analytics, digital twins, sensor data and AI governance.

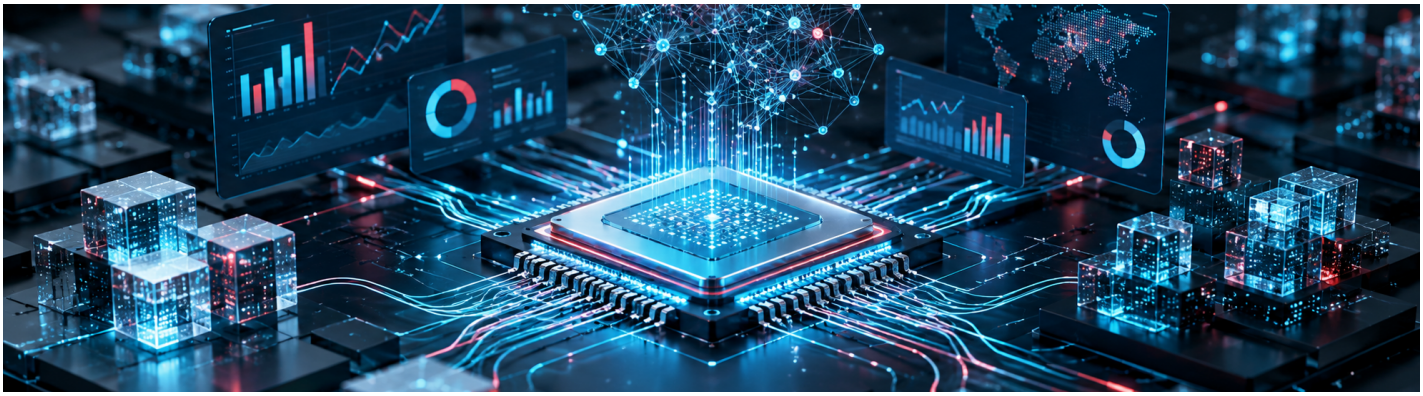
Smart Governance & Digital Citizen Services
Explore digital identity, eGovernment, citizen platforms and open data governance.

02 / Technical Training

4 PROGRAMS

AI, Data & Emerging Technologies

Build capability in data-driven and emerging digital solutions.



Artificial Intelligence and Machine Learning

Understand AI and ML foundations, model development, deployment and ethical considerations.

Data Science Analysis

Explore, analyze and visualize data; apply statistical and machine learning techniques.

Big Data

Understand distributed computing, storage and processing to extract insights from large datasets.

Blockchain

Understand blockchain principles, solution design and applications across industries.

Campus

AI-Based Learning Management System - LMS

Cloud-based skillset development, monitoring and management

Bring training programs, trainer performance and learner progress into one connected platform for monitoring, reporting and development.

Monitor the Full Learning Journey

Training Programs

Real-time progress tracking; performance metrics; content usage analytics; compliance monitoring.

Trainers

Trainer performance metrics; feedback collection; session recording and review; professional development tracking.

Trainees

Individual progress reports; engagement metrics; skill assessment; goal tracking.

Connected Tools for Learning Management

Dashboard & Analytics
Centralized dashboard and customizable reports.

Alerts & Notifications
Automated progress alerts and achievement notifications.

Interactive Engagement
Surveys, polls and discussion forums.

Integration Capabilities
Data integration and connectivity with third-party tools.

Major Partnerships

Technology expertise and authorized learning relationships.

Several "Partner of the Year" awards

- Cisco Official Networking Academy
- Huawei Authorized Learning Partner
- Microsoft Authorized Training Learning
- VMware Authorized Learning Partner
- EC-Council Authorized Training Center
- AWS Authorized Learning Partner
- PECB Authorized Training Partner
- PMI Authorized Training Partner
- CompTIA Authorized Delivery Partner
- Pearson VUE Authorized Training Partner
- ISC2 Official Training Partner

Partner Ecosystem

Professional development supported by a broad technology and certification ecosystem.

Our Customers

Customer footprint across the Middle East, UK, Americas, South Asia and Africa.

Major Customers (Middle East | UK | Americas)

Major Customers (South-Asia | Africa)

Capability With Purpose

Corvit Networks provides professional training across leadership, finance, governance, cybersecurity, IT and emerging technologies. Programs can be tailored to organizational objectives and workforce needs.

Our Approach

01 **Training Needs Analysis**

Align learning with operational priorities and organizational goals.

02 **Applied learning**

Case studies, simulations, scenarios and interactive workshops.

03 **Flexible delivery**

In-house training, executive workshops, certification pathways and blended learning.
